EXPLANATION APPLICATION FORM

The application form consists of two parts. The first part contains the administrative details and the second part deals with the specific Go-secure mailbox. It is important that both parts are filled out to establish the mailbox and make the required certificate.

Digital certificate

A digital certificate ensures that one can identify oneself over the Internet. The communication service Go-service Go-secure uses company certificates to guarantee the identity of every trading partner, both the sender and the recipient. Moreover, the identity of users can be checked and therefore InterCommIT can ensure that only authorised users have access the communication service. Digital Certificate: Further, due to encryption, the integrity of the data (no alterations during transport) is ensured and no unauthorised persons can read the information.

InterCommIT only provides a certificate when the information you provided is correct after checking with the Chamber of Commerce.

Additional services

Your standard Go-secure postal box can be completed with additional services if required. Please find a description of the services below, or check our website: <http://www.intercommit.com> (services, go-secure)

- **Go-secure gateway services:**
Thanks to gateways you can exchange data via Go-secure with all your trading partners, regardless the protocol they use. Examples are AS2, X.400, OFTP, PGP. The Globe Gateway enables automatic despatch of harmonisation statements to your partners.
- **Elite:**
Elite is a tool which enables you to track and trace the messages sent and received by Go-secure simply by using an Internet browser. The status of every message can be checked at any moment, from different locations if desired, and you can make statistics and graphics of the communication.
- **Go-secure Alert Notification Service:**
With the Go-secure Alert Notification Service you are notified about new messages that are received or about messages in queue.
- **Go-secure Mobile Escape Service:**
If the primary internet connection fails you can be up-and-running with your EDI communications with the Go-secure Mobile Escape Service.
- **Go-secure Live Support:**
Support as if a ServiceDesk employee is next to you but without the on-site fees. Granting service is thus faster and moreover more effective.
- **Go-secure Central Archiving:**
Go-secure provides for archiving invoices electronically according to the Tax and Custom administration offices in the EU countries.
- **Harmonisation Statement Service:**
This service enables you to have harmonisation statements generated and communicated.
